SUMMARY

Certified Product Manager with 5 years of fintech experience owning end-to-end product delivery such as eliminating \$200M in regulatory compliance risk, cutting data issue triage time by 90%, and delivering a \$5M compliance monitoring dashboard. Led product strategy and data governance across a \$9B home-lending portfolio at Discover Financial Services, defining roadmaps, prioritizing backlogs, and aligning engineering, compliance, and business stakeholders around scalable AI readiness.

EXPERIENCE

Data Product Manager | Capital One (Discover) | Dallas, TX | February 2025 - October 2025

- Decreased manual data reconciliation and operational cost by standardizing 20,000 attributes across more than 230 warehouse tables and modeling scalable AI capabilities
- Reduced issue identification time by 90% and manual triage efforts by 50% by defining and implementing Critical Data Elements (CDEs) with full lineage to regulatory reports, supporting automated data quality alerts and vendor notifications
- Automated data quality protocols to identify illogical conditions and noncompliant loan attributes in accordance with lending guidelines, resulting in a reduction in manual exception reviews and an increase in data reliability
- Collaborated with Internal Compliance team to deliver a comprehensive Compliance Management System (CMS) plan to key regulators, ensuring effective oversight of all regulatory controls within the Home Mortgage Division

Product Manager | Cognizant | Dallas, TX | April 2021 - February 2025

- Partnered with clients to deliver SDLC projects that enhanced user experience, streamlined workflows, and automated processes to improve operational efficiency for following clients: Discover, Global World Bank, NTC, Wells Fargo (indirect)
- Led end-to-end cross-functional development of a \$5M compliance monitoring dashboard, eliminating \$200M regulatory violations, identifying process gaps, and driving operational improvements through strategic roadmap ownership
- Managed product roadmaps and prioritized backlogs for four Agile teams by leading requirements gathering, user stories, process flows, and BRDs, ensuring strong alignment between business and technology teams using Jira and Confluence
- Doubled project portfolio and boosted revenue by 50%, delivering successful projects and securing additional resources
- Presented to senior leadership and translated complex data into key insights for decision-making

PROJECTS

- **Compliance Monitoring Dashboard | Discover:** Led automation of \$5M compliance monitoring dashboard at Discover by mapping HMDA, ECOA, FDPA controls, standardizing documentation, prioritizing the backlog, and partnering with control owners and developers to build a loan-level monitoring dashboard resolving \$200M compliance challenge
Impact: Strengthened regulatory coverage, reduced manual effort, improved testing accuracy, and surfaced process defects with actionable insights for senior leadership
- **Data Governance and Quality | Capital One:** Partnered with engineering and compliance teams to implement a scalable data governance and quality framework, enabling AI-ready data capabilities across a \$9B home loan portfolio
Impact: Improved data quality, data lineage, and data trust while enabling AI scalability
- **PerfectDocs Cloud Migration | Cognizant:** Owned end to end SDLC migration of NTC's lien release platform to Azure, leading 4 scrum teams, requirements gathering, backlog management, roadmap execution, and agile ceremonies
Impact: Improved user interface and journey to successfully retain enterprise clients including Wells Fargo and US Bank
